A B S T R A C T

Venture management is a business management discipline that focuses on being both innovative and challenging in the realm of introducing what could be a completely new product or entering a promising newly emerging market. The discipline is focused on the skills, practices and technology required to manage the rapid growth of new business in highly dynamic environments. These environments are often characterized by rapid technology change.

Keywords: Venture Planning, Business Plan

Introduction

Venture Planning is a personal assessment of your feelings and the feasibility of venture. Venture Planning answers the question, should I be doing this and why? A type of written plan that is written by an entrepreneur as to how they will manage and direct their new business and attain specific business goals. This will help the new business owner in obtaining financial resources for attaining these goals.¹

Meaning

Venture refers to a risky start-up or enterprise company. New ventures are a business plan that gives an opportunity or chance to set up a company/ business on the basis of innovative ideas. It is built upon customer driven ideas or technology.

Venture Planning

It is not a matter of writing a Business Plan. Venture Planning does not involve comprehensive endowment, source analysis, professional ideas, business structure or detailed market analysis. Venture Planning is the development of a comparative approach, various business models, usually by making a financial model to answer the following questions.¹

- Which business idea produces the most sales, the best production, the highest profit and the lowest breakeven?
- What model requires less investment for entrepreneurs

and others?

- Which concept needs equality as opposed to funding?
- Which produces the highest “Return on Investment” and the best money?
- Which model requires an entrepreneur to offer a small equity?
- Find and estimate the risks involved in making each model

Venture Planning Stages

Idea

Business plans are an important test of clarity of thinking and clarity of the business. It is important that everyone has a clear understanding about the goal and objectives of organization new idea involves the process of creating realistic goals to be achieved. Thus it makes a business goal oriented. Today’s world and markets are growing dynamic every day, in order to exceed competition, out of the box ideas are required to manage the functions of the enterprise. Venture an idea for a business that includes basic information such as the service or product, the target

demographic, and a unique selling proposition that gives a company an advantage over competitors.

Concept Development

Venture planning is the fundamental management function, which involves deciding beforehand, what is to be done, when is it to be done, how it is to be done and who is going to do it. It is an intellectual process which lays down organization's objectives and develops various courses of action, by which the organization can achieve those objectives. It chalks out exactly, how to attain a specific goal.

Venture Development

Venture development is the essence of HRM. It is a continuous activity which absolutely has no end. Initiating new ideas and challenges are important in achieving task of any organization. Competent technical skills are required to meet them. New strategies are required to overcome the storm created by the new trend. Managers must be shrewd enough to prove their dominance over rival.

Monitoring Progress

It refers to the evaluate the progress of the organization based on the objectives by evaluation reports before, during, and after the operational plan is implemented. Management has to plan for long-range and short-range future direction by looking ahead into the future, by estimating and evaluating the future behaviour of the relevant environment and by determining the enterprise's own desired role.

Initiating New Changes

Planning to initiation new changes means thinking about what is to be done, who is going to do it, and how and when he will do it. It also involves thinking about past events (retrospectively) and about future opportunities and impending threats (prospectively). Identify untoward conditions that could develop in achieving each objective. Decision-making is the key part of manager's activities. Decisions are important as they determine both managerial and organizational action.

New Plans

New Planning increases organizational performance and reduces the risk involved in modern business operations. Helps to coordinate within the organization. It helps to organize all available resources. It provides the right direction for the organization. It is important to maintain good control. It helps to achieve the goals of the organization. It motivates the staff of the organization.

Business or Operational Plan

It an outline of the future strategy will focus on for the future plans of an organization. It encourages managers'

creativity and innovation. It also helps in decision-making. Operational plans are developed based on the long term objective and short term objectives.

Budget vs Actual

It refers to the process of comparing estimated results to actual results. Businesses study budget to actual to evaluate their performance, forecast future income and identify any operational centers that are performing differently than expected or gain profit and loss.

Venture Feasibility Analysis

It serves a critical function in independently evaluating a plan or planned course of action. A feasibility analysis is to determine if it (1) is technically feasible, (2) is feasible within the estimated cost, and (3) will be profitable.²

Rising Venture Areas in Nursing that Needs Planning

Often there is a crisis in the health care system in which nurses try to protect those present acclimatize models instead of accepting change. For good planning for successful businesses, managers should examine existing (traditional) facts, and analyze and agree with the changing nature of nursing. Some conventional facts are:

- Institutional-based care
- The process is well directed
- Process determined
- Based on mechanical and guide interventions
- Provided by the provider
- Supportive behavior/ management
- Indicates phase time interventions
- Based on direct clinical relationships

Application of Venture Planning in Nursing Practice

According to Porter, O'Grady (2003), the rising realities of nursing practice will be:

- Departure is based on multiple settings

- Continuous effect
- Best practice
- Emphasis on technology and minimal non-invasive interventions
- User-driven
- Health system
- Preparing for early intervention
- Based on horizontal clinical relationships

Supportive Research

Jianwen (Jon) Liao conducted a Panel Study of Entrepreneurial Dynamics (PSED) to explore whether engaging in business planning and the degree of planning formalization, combined with other activities, was more likely to result in the creation of new businesses. A review of longitudinal studies of emerging entrepreneur planning behaviors is provided and hypotheses are suggested about the relationship of pre-venture planning and planning formalization to success when starting new ventures. Findings of the study suggested that growing entrepreneurs who completed a business plan were 6 times more probable to start a business than individuals who were not able to plan any business plan. In addition, growing entrepreneurs who contact and participated in government-sponsored entrepreneurship programs were 5 times more possible to start a business than entrepreneurs who did not look for government assistance.
